

Profile Summary: Hazlina Abdul Hamid ACMA, CGMA

Hazlina has over three decades of expertise in the oil and gas industry, with significant contributions to the petrochemical business sector. Throughout her career, she has played pivotal roles in high-value investment projects and organizational change, while championing excellence in risk management, crisis preparedness, business continuity, and ESG development.

She established and institutionalized the Risk Management function, leading the design and execution of enterprise-wide risk and business continuity frameworks for a public-listed company, thereby strengthening organizational resilience, safeguarding stakeholder interests, and elevating governance standards.

Hazlina is recognized for spearheading strategic risk assessments that informed decisions on mergers, acquisitions, and capital projects, while strengthening board governance through the establishment of effective committees and frameworks

She is passionate about strengthening leadership through interactive risk culture training, highlighting the importance of applying risk management in everyday life.

Hazlina is recognised to effectively responded to crises and established robust business continuity plans (BCPs) to sustain operations during prolonged disruptions. She has navigated complex crises, from the COVID-19 pandemic to geo-political tensions, ensuring continuity of operations and reinforcing resilience across supply chains.

Recently, Hazlina reviewed risk management implementation in Government-Linked Companies (GLCs), benchmarking practices against ISO 31000:2018 Guidelines. She provided strategic insights to strengthen governance and recommended sustainable improvements to enhance organizational resilience

With her industry insight, she successfully aligned corporate strategy to national sustainability priorities, contributing to Net Zero Carbon Emission (NZCE) through circular economy approaches and setting a precedent with pioneering sustainability risk disclosures that achieved compliance to IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information and IFRS S2 Climate-related Disclosures.

She is well-versed in Malaysia's Main Market Listing Requirements (MMLR), corporate governance, and regulatory compliance for public-listed companies, with a proven track record of translating these frameworks into effective, practical implementation.

Hazlina, an accredited trainer with HRD Corporation, facilitated external training during National Training Week, where her sessions drew the highest participation and earning commendable feedback from attendees.
